

ABOUT PEM

PEM FOUNTAIN COMPANY and its family of PEM distributors around the world endeavour to assist designers, architects, engineers and contractors in their quest for successful and enduring projects in the containment and display of water.

Design and engineering assistance for complete installations will be provided by PEM distributors knowledgeable about particular types of construction and engineering / or are familiar with local conditions and requirements.

PEM FOUNTAIN COMPANY does not engage local agents or representatives in any particular country.

PEM FOUNTAIN COMPANY does not participate in bidding or contracting of any kind other than to supply PEM equipment.

All sales and obligations by this Corporation are subject to the terms & conditions of sale published as part of the current pricelist which take precedent over any and all others and are available upon demand.

The designers, purchasers, installers and end-users utilizing the equipment described herein assume full responsibility for full implementation of all descriptions and requirements as set out in the PEM Catalogue and PEM Website as well as compliance with all other applicable codes, requirements and / or ordinances, their applicable articles, intents and all consequences.

Where the manufacturer / supplier of the equipment described herein does not control its application or usage he assumes no responsibility whatsoever for any or all consequences arising out of the application, installation and / or usage of this or any other associated equipment or materials.

Specific considerations for use of PEM Spray and other equipment for and in public splash pads, public spray pads and/or public walk over water displays with uncontrolled access for children, people and animals: As the design & installation of public splash pads, public spray pads or public walk over water displays accessible to children, people and animals without complete access control and supervision might be hazardous to health and life due to possible water contamination, it must be subject to: Approval, Registration, Inspection, Certification and Continuous Monitoring by all applicable Health and other Authorities. Compliance to given requirements and standards by all involved in the design & construction of such projects is necessary for the protection of all, with complete records preserved for the life time of the project and accessible upon demand.

The trademark 'PEM' is a registered and patented trademark in major countries throughout the world identifying equipment as manufactured by and for PEM Fountain Co., a Division of Imperial Irrigation Co. Ltd, an Ontario, Canada Corporation.
